You race against **eight** computer riders and must finish in the **top three** in order to compete on the next Circuit. The **Lap Counter** (top-right) shows which lap you are on, and the **Position Counter** (top-left) shows your race position. Two meters at the top of the screen show your **Fuel Level** and the condition of your **Tyres**. Below these are the **status readouts** for your **Accelerator, Brakes, Turbo** and **Motor** – a yellow border appears around the word if one of these features becomes damaged.

When the message **"PIT IT"** appears you can pull off the track into the **pits** to **refuel** and **repair** your bike. Use **up** and **down** to select options from the **Pit Menu** and **hold down Fire** until the job is complete (the warning indicator disappears). Quick though – it all takes valuable time! HINTS

★ The **TURBO** feature is most effective at speeds of over **150 Mph**.

★ **Skid** too much and you'll blow your **tyres** out!

★ If your tyres blow or you run out of fuel your bike will slow to a halt but you won't be **disqualified** until the other bikes have finished the race – use **QUIT** to give up instantly.

SUGGERIMENTI

- ★ La funzione **TURBO** è d'efficacia massima alle velocità oltre i **150 Mph**.
- ★ Se **slittate** troppo farete scoppiare i vostri **pneumatici!**
- ★ Se i pneumatici scoppiano o finite il carburante la motocicletta rallenterà finché si fermerà ma non sarete **squalificat** finché le altre motociclette hanno finito la gara – usate **QUIT** per lasciare la gara istantaneamente.
