

# SHADOW/FIRE

## **INTRODUCTION**

Welcome to the world's first-ever icon-driven adventure: **Shadowfire — rescue from Zoff V.**

## **MISSION BACKGROUND**

At this time starships can jump from star to star using their hyper-drives. They are unable to jump into a planet's orbit. General Zoff, traitor to the Empire exploits this situation. His skyfortress, Zoff V, lurks behind the perilous asteroid belts which ring planet Norgol. There he plots the conquest of the Empire's peaceful worlds.

However, plans for a new kind of starship do exist. They propose a craft called Shadowfire, able to jump from planet to planet. If Zoff had the plans he could ravage any part of the empire. If the Emperor had the plans he could destroy Zoff.

Unfortunately, Ambassador Kryxix has the plans, hidden in a micro-disc embedded in his spine. The ambassador is held captive aboard Zoff V. In a few short hours Zoff's inquisitors will discover the plans, unless the Empire's Enigma team can rescue Kryxix.

Enigma is a shadowy organisation dedicated to the Emperor's service. Its operatives are the cream of the Empire's legions, the worst of its criminal scum or the latest development in cybernetics. Its mission controllers are dedicated. That is why you have been chosen to head this mission. The Empire commands! Your team awaits!

## **GAME OBJECTIVES**

You have one hour and forty minutes to accomplish the Shadowfire mission. Using the abilities of the Enigma team you must locate and rescue Ambassador Kryxix, apprehend and capture General Zoff, then capture or destroy the starship Zoff V. You can accomplish these tasks in any order!

The mission opens with the Enigma craft moored alongside Zoff V. Your first task is to beam some or all of your team aboard using the abilities of the droid Manto.

## **MISSION BRIEFING:**

If this is your first SHADOWFIRE mission select the character MANTO.

## **CHARACTER STATUS SCREEN**

Each Enigma character has four screens: Status, Objects, Movement and Battle. This is the first. The icons show:

## Icon Description

## Icon Use/Meaning

### Running figure

- Agility: this bar shows the speed of movement possible for each character.

### Strong arm

- Strength: the green bar indicates the strength (or weakness) of a character. It may change length during the mission.

### Heart

- Stamina: this bar is most likely to decrease during the mission! It shows the physical endurance of each character.

### Scales

- Weight: when a character picks up an object a green bar will appear. If the object is too heavy the bar will turn red. Simply drop an object(s) to restore the bar to green.

---

HINT: Strength, Speed, Agility and Weight are all connected. Some characters are stronger, some faster, some have more Stamina and some can carry more. (Consider the hints under each of the character's PROFILES elsewhere in this manual.) Weakened characters may recover during the mission.

## MISSION BRIEFING:

Select Manto's yellow monitor and enter his Objects Screen.

## OBJECTS SCREEN

You enter this screen by selecting the Yellow Monitor icon on any screen connected with the character in play. This screen enables you to command a character to manipulate objects.

This screen belongs to the Manto character at the start of the mission. At left are the objects in the same location as Manto. In the middle are the objects carried by the character (there will be none at the start of the mission). Along the bottom a bar will register the weight of objects carried.

On the right of the screen are the icons which allow you to manipulate objects:

### Gun-knife exchange

- Ready for use: This icon lets you select which object a character will hold ready for immediate use. Move the cursor over the icon desired on either the left or middle sections of the screen and press ENTER. The object will appear below this icon.  
Hint: Make sure you use this icon when you arm a character, otherwise you will be obliged to use bare hands in combat!

The remaining icons on this screen are Green Monitor (Movement Screen), Red Monitor (Battle Screen) and Quit.

Hint: Tools are normally activated using the following icons: Activate/Objects icon. However, specialist objects may require an additional command icon, eg: The Self Destruct unit (see Objects briefing). Such objects are activated using the following icons: Activate/Command icon.

Weapons are automatically activated in combat situations, but only if the character has a weapon held at the ready. Apply the following sequence of icons to the weapon of your choice which is already carried by the character Ready for use: Object icon. The chosen weapon will then appear below the Ready for use icon.
