

PAC-MAN*

A Warner Communications Company 

THE ESSENTIAL PAC-MAN

At 10 points each, these
are a dot-chomper's delight.

INSERTING THE CARTRIDGE AND JOYSTICK CONTROLLERS

Turn on the ATARI® Home Computer by pressing the power switch on the right side of the console to ON. Pull the release lever towards you to raise the cartridge door. (Whenever you do this the computer automatically turns itself off.)

Insert the PAC-MAN game cartridge into the slot (the left cartridge slot in the ATARI 800™ Home Computer) with the label facing you. Press down carefully and firmly. Close the cartridge door, and the computer turns on again.

For one player, plug a Joystick Controller into Controller Jack 1. For two players, plug a second Joystick Controller into Controller Jack 2. Hold the Joystick so the red button is in the upper left corner.

THE SELECT KEY

Press the SELECT key on the computer for a two-player game. Press it again to return to a one-player game.

THE START KEY

Press the START key on the computer to begin the game or restart the game at any time. The button on the Joystick will also start your race through the maze unless you're in the middle of a game.

Watch out for these gobbling goblins — they're nothing but trouble.

Eat an energy dot and you can gobble those goblins back.

For an extra treat, keep your eyes open for tasty bonus nuggets.

THE OPTION KEY CHANGES DIFFICULTY

Press the OPTION key to change the level of difficulty you start at — represented by symbols below the maze. Cherries are the least difficult. Each time you press the option key the symbol changes, from cherries to a strawberry and so on up the scale.

THE SYSTEM RESET KEY

The SYSTEM RESET key on the computer resets the game, returning to the one-player selection and the lowest skill-level option. The high score from any previous game is retained on the screen, until the computer is turned off.

THE SPACE BAR PAUSES THE GAME

Press the SPACE BAR on the computer if you want to pause in the middle of a game. Press the SPACE BAR a second time to pick up where you left off.

Try one of these Pac-Man!

These tasty bonus nuggets are valuable prizes,
Clear out the maze and their value rises.
Every half-minute, they're yours for free,
But you've got just 8 seconds to grab one and flee.

-  100 (1st maze)
-  300 (2nd maze)
-  500 (3rd, 4th maze)
-  700 (5th, 6th maze)
-  1000 (7th, 8th maze)
-  2000 (9th, 10th maze)
-  3000 (11th, 12th maze)
-  5000 (13th maze on)

Over here, Pac-Man!

Bite an **energy dot** and the goblins turn blue,
And that means **50 more points** for you.
It's also your chance to turn the table,
So chase those goblins and bite while you're able.
The more goblins you grab, the more points you score.
200, 400, 800, then more!
But when they start blinking, you better turn track,
'Cause that's when the goblins' true colors come back.

-  200
-  400
-  800
-  1600

Look out, Pac-Man!

The goblins are coming, they're on the attack, man.
You like to chomp dots, but they like chomping PAC-MAN.

-  Blinky is fastest, so watch where he goes.
-  Pinky is sneakier than anyone knows.
-  Inky has quite a few tricks up his cape.
-  Clyde cuts you off so there's just no escape.

Get movin', Pac-Man!

Two big lips smacking in the middle of your face,
Chomping on those dots to stay ahead in this race.
Stay ahead of those goblins, cause they're trouble no doubt.
Get yourself nabbed just three times and you're out.
But there's good news for you when you rack-up the score!
Reach 10,000 points and you get one turn more!

 **URNS REMAINING**

SKILL LEVEL

Keep goin', Pac-Man!

There's plenty of **dots** in the goblin neighborhood!
And at **10 points each**, they're lip-smacking good!

"At ease, Cadets. Welcome to PAC-MAN strategy school. Cadets, I'll be honest. Your chances aren't good. Some of you won't be coming back after today. So listen up and you'll be a lot safer."

"When they leave the goblin house, the goblins go to a particular corner. They search for you with a pattern. Learn their patterns. And keep your eyes peeled after the second maze; the patterns change and the goblins search for you harder and faster."

"Once the goblins get your scent, you better get moving. You can gain a bit on a goblin by turning a corner. Use the exits to gain a bit or evade them. Try to make them lose your scent by changing direction rapidly."

"If they're onto you, stop munching and run down an empty corridor. You go 20% slower when you're munching dots."

"The survivors tell me it's tough to get away from the goblins. But stay far enough away from them for 20 seconds, and they'll give up and go back to the goblin house. Better watch out, though. When you're munching the last ten dots, the goblins team up and sniff you out like bloodhounds!"

"One last word, Cadets. Use your energizers wisely. Lure all the goblins into an energizer, then gobble 'em all down. Gobbling the first one is worth a measly 200 points, but the fourth adds a whopping 1,600 points to your score."

"Be extra careful with your energizers after the second maze: the goblins stay blue for less and less time."

"Good gobbling and good luck!"
