THE GAME

You've just made a long, hard climb up the rocky cliff beneath Akuma's castle. You pull yourself up onto solid ground only to find yourself standing before a massive gateway, your way barred by the first of the palace guards. Beyond looms Akuma's palace, where the fair Princess Mariko is being held captive. You must rescue her from the evil Akuma.

You can withstand only a limited number of hits. The row of arrows across the bottom left of the screen (orange on the Apple and IBM, red on the Atari and Commodore 64) tells you how many. Every time you get hit, you lose one arrow. If your last arrow disappears, you die. The row of blue arrows across the bottom right of the screen indicates the strength of your opponent. As long as you avoid getting hit, your strength will be replenished.

Every guard has a different headgear and fighting style. As a rule, the guards get tougher as you advance into the palace.

When you kill a guard, take advantage of the opportunity and run forward. Watch for danger when you're standing or running. In these positions you're vulnerable to attack — one well-aimed blow could kill you!
