**WARNING: PLEASE CAREFULLY READ THE PRECAUTIONS BOOKLET INCLUDED WITH THIS PRODUCT BEFORE USING YOUR NINTENDO® HARDWARE SYSTEM, GAME PAK OR ACCESSORY. THIS BOOKLET CONTAINS IMPORTANT SAFETY INFORMATION.**

**IMPORTANT SAFETY INFORMATION - READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES**

**WARNING - Seizures**

Some people (about 1 in 4000) may have seizures or black outs triggered by light flashes, such as while watching TV or playing video games, even if they have never had a seizure before.

Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions  
Altered vision

Eye or muscle twitching  
Involuntary movements

Loss of awareness  
Disorientation

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

**WARNING - Repetitive Motion Injuries**

Playing video games can make your muscles, joints or skin hurt after a few hours. Follow these instructions to avoid problems such as Tendonitis, Carpal Tunnel Syndrome or skin irritation:

- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms during or after play, stop playing and see a doctor.

**WARNING - Battery Leakage**

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- Do not dispose of batteries in a fire.

# Story

In a far away time on a far away planet,  
there is a **Space Port**.  
This **Space Port** is inhabited by thousands of little **ChuChus**.

**ChuChus** aren't  
ordinary mice.  
We're space mice!

The things that **ChuChus**  
detest more than anything  
else are **KapuKapus**.

**KapuKapus** aren't  
ordinary cats.  
We're space cats!

The **ChuChus** lived happily  
until one day, when...  
The **Space Port** became  
infested with **KapuKapus**.

Oh no! Look at all  
those cats!

What should  
we do?

The fate of the  
**ChuChus**  
is in your hands!  
The "**ChuChu Rocket!**"  
launch countdown has  
started!

Which rocket  
should we go in?

# Controls

## Controls During the Game

Move the Cursor with the Control Pad. There are 3 methods to place an Arrow Panel. "Rotate A/B" is selected by default. But try and find the method that is best for you. You can change the method of controls in the Options.

### Rotate A/B

Press either A or B Button, to place a panel where the cursor is located. Press the button continuously to rotate the arrow. Perhaps this is the easiest method to master? Try this first.

**A Button:** Places "▲". Press A again continuously to rotate the arrow in the following order: "▶" to "▼" to "◀" and so on.

**B Button:** Places "▼". Press B again continuously to rotate the arrow in the following order: "◀" to "▲" to "▶" and so on.

### A & +

By pressing A and Control Pad simultaneously, you can place the panel to the direction Control Pad is pressed, where the cursor is located. For example, press A and up on the Control Pad, and you can place "▲". Be careful, though, because nothing happens if you press only the A Button.

### Pro

Press A, B, L or R Button to place an Arrow Panel that is assigned for each button. It may be hard, if you don't get used to it.

**A Button:** Places "▲" Panel.

**B Button:** Places "▼" Panel.

**L Button:** Places "◀" Panel.

**R Button:** Places "▶" Panel.

### Arrow Panels

You can only place up to 3 panels on the stage. If you try to place a 4th panel, the first panel will disappear.

# Game Display and Rules

## Game Display

**Rocket**  
Guide the ChuChus to your Rocket!

**Hatch**  
Mice and cats come out here.

**Cursor**

**ChuChu**  
They're simply mice.

**KapuKapu**

**Arrow Panel**

## Rule

Use the Arrow Panels to lead ChuChus to your Rocket! But don't lead KapuKapus to your Rocket!

## How Do ChuChus Move?

Usually ChuChus run in a straight line, but if they bump into a wall, they turn right. If there is an Arrow Panel, they turn in the direction indicated.

CHUCHU ROCKET

## Different Sorts of ChuChus!

If you guide a ChuChu with a "?" mark into your Rocket, the roulette wheel will spin and there will be a new game "event"!  
If you guide a ChuChu with a "50" mark into your Rocket, you will get 50 ChuChus in one

## Look Out for KapuKapu!

If a KapuKapu enters your Rocket, you will lose some of your ChuChus. Guide KapuKapu to your opponent's Rocket!

## Arrow Panels Can Break!

If a KapuKapu bumps head-on into an Arrow Panel once, it will shrink a little. If a KapuKapu bumps head-on into an Arrow Panel the second time, it will break and vanish.
