MOVE CONTROL INDEX

Directional button = Up, Down, Back, Forward, (U, D, B, F)

- LP = Low Punch
- LK = Low Kick
- HP = High Punch
- HK = High Kick
- BLK = Block
- RN = Run

If you're not happy with the default controller configuration, you can modify it the way you like (see **Configure Controller**, pg. 9).

MAIN MENU

At the Main Menu, press the Directional button **Up** or **Down** to highlight an option, then press the X button to select from one of the many game modes. They are:

ARCADE

1 ON 1 KOMBAT

It's you against the CPU. You select one character, then go to the Destiny Screen to choose the difficulty of your journey. Also, you can take on a buddy in a 2 player game. Each player selects one character, then goes straight to a Lair to battle it out.

2 ON 2 KOMBAT

Select 2 characters, then take on 2 characters chosen by the CPU. You'll then go to the Destiny Screen to select the difficulty of your opponents. When you or the CPU loses the first match, the second chosen character will appear to continue the battle. A loser is determined when both chosen players have been eliminated.

Also, you and a friend can choose two characters, then battle it out. When a player loses his first match, the second chosen character will appear to continue the battle. A loser is determined when both chosen players have been eliminated.

TEAM

You take on the CPU or a friend with a team of MK4 characters. When you select this game mode, you'll go to the Choose Team Size Screen. Press the **Directional button Up** or **Down** to highlight options. To select the size of a team, press the **Directional button Left** or **Right**. When your team sizes are set the way you want, select Choose Team Members to set up your team.

MAIN MENU

You'll view the Character/ Team Select Screen. Follow on-screen instructions to set up your team. Select **Begin Fight** when you're ready. Press the **Start button** to change the team to Human. (See **Team**, on the previous page, for team selection instructions.) The player who loses all his characters first will be defeated.

ENDURANCE

You'll view a sub menu when you select this option. When you select **Endurance** from the sub menu, you'll select a character, then go to the Destiny Screen to select a difficulty. You'll fight one round at a time against each character on the column you choose on the Destiny Screen. Your **Health** never regenerates in any Endurance mode, and you must win every match to win. Lose one match, and the game is over.

VS ENDURANCE

The CPU chooses the characters for you and a friend in a pre-determined order. Both players use each standard character in the game to continue battling each other. When one player uses all of the game's standard characters, the endurance match is over. The player with the most wins claims victory.

ULTIMATE ENDURANCE

You'll fight one round at a time against each character in the game. Lose one match, and the game is over. When you're finished (win or lose), your **Ultimate Kombat Rating** will be displayed with statistics and a Kombat rating level.

TOURNAMENT

The Tournament Mode lets you select a 4 or 8 player tournament. Up to 3 or 7 of your friends can participate to complete a tournament field. Here's how (see next page):

MAIN MENU

TOURNAMENT SETUP

When you select **Tournament** from the Main Menu, you'll view the Tournament Setup Screen. Press the **Directional button Left** or **Right** to select a 4 or 8 Player tournament. Highlight **Show CPU Battles**, then press the **Directional button Left** or **Right** to toggle between **Skip** and **Show CPU Battles**.

Select **Number of Fighters**, then press the **Directional button Up** or **Down** to highlight a character for each of the players. Press the **Directional button Left** or **Right** to cycle the available characters, then press the **X Button** to cycle between Human and CPU controlled players. To change the difficulty level of a player, press the **O button**. Repeat this process until the tournament is set up the way you want. Press the **Start button** to view the Tournament Bracket, then press the **X Button** to begin fighting.

Highlight this option, then press the **Directional button Left** or **Right** to increase or decrease the volume of the game's **Sound Effects**.

MUSIC VOLUME

Highlight this option, then press the **Directional button Left** or **Right** to increase or decrease the volume of the game's **Music**.

KOMBAT THEATER

When using your **Memory card**, the ending of the character you just beat will be saved. You can view the movie at any time by selecting the character's icon in the **Kombat Theater**. Press the **L1 button** to view the selected character's biography.

MEMORY CARD

Use this option to **Load** or **Save Configuration Data** and options settings to your **Memory card**. Highlight the option you want, then press the **X button** to **Load** or **Save** data.

When saving data, your **Controller Configuration** and any game configuration settings will be saved to the **Memory card** until the next time you play **Mortal Kombat 4**. The **Memory card** will automatically load any saved data when powering up the console, as long as you have a **Memory card** inserted in your **PlayStation**.

* IMPORTANT WARNING *

Do not remove the **Memory card** from the console when it is in the process of saving your data. Doing so may cause damage to the **Memory card**.

SELECT YOUR FIGHTER

After selecting any game mode, you'll view the Fighter Select Screen to choose the player you want to fight with. It displays all the available characters and 3 selection options.

Press your **Directional button Up, Down, Left or Right** to highlight a player or option, then press the **X button** to select. Included are 3 other on-screen options you can use to select your player(s):

RANDOM

When you select this option, the computer will randomly choose a character for you.

GROUP (2 PLAYER ONLY)

When you select this option, the computer will display and select players in a particular order. You must defeat your opponent with each character chosen by the computer. Once you've defeated your opponent with all the characters, you can then fight with one of Mortal Kombat 4's hidden characters.

HIDDEN

This is handy for a 2 player game. If you don't want your opponent to see the player you select, select this option first. It will hide your cursor, but make sure you keep track of how many times you select **Up, Down, Left or Right**. If you get confused, even YOU won't know who you selected.

Note: If both players select the same warrior, player two will be displayed with a different color.

CHOOSE YOUR DESTINY

Once you've chosen your fighter in any 1-Player Mortal Kombat 4 mode, you'll view the Destiny Screen.

Press the **Directional button Left or Right** to highlight a pillar, then press the **X button** to select one of these columns: Novice, Warrior, Master or Master II. Press the **Start button** to rotate the pillar to choose a different sequence of opponents.

To claim ultimate victory, you must defeat each of the characters on the column. Each time you defeat an opponent, you'll return to this screen and view your next opponent.

If a second player wishes to join the fight, he or she may do so at any time by pressing the **Start button** on the second controller. Both players then return to the Character Select screen to select a fighter.

FIGHTING SUMMARY

Mortal Kombat 4 tests a Warrior's fighting skills by pitting him against increasingly formidable challengers. In all Mortal Kombat battles, **Health Meters** in the upper portion of the screen measure each warrior's diminishing health.

The meters begin each round reflecting health at 100%, but the amount of health is reduced with each blow taken. The reduction amount depends on the type of contact and whether or not it was blocked. When a Warrior's **Health Meters** is depleted, he/she is knocked out and the round goes to the opponent.

Each match has a 99 second **Match Time** limit. If the time is up before either combatant has been defeated, the warrior with fewer injuries is declared the victor. The first warrior to win the match takes the match and moves on to the next opponent.

The **Run Meter** allows you to run toward your opponent and perform combos, but they are "time sensitive", so you can only activate the Run function (or Combo function) while the meter is green.

If you're defeated by an opponent, you'll find yourself plummeting helplessly into the darkness of a very deep pit. If you have a **Continue** available, press the **Start button** to return to the Select a Fighter Screen and select another fighter for battle.

BASIC MOVES

Each Mortal Kombat Warrior has spent years of concentration and intense training to perfect his/her martial arts skills. Before challenging these warriors in kombat, you'll also need intense training and concentration to learn these fundamental skills.

The best way to begin your training is with the fundamental moves: **Kicks, Punches, Crouches, Jumps** and **Blocks**.

These moves may seem trivial compared to powerful and acrobatic moves, such as a Flying Kick. However, knowing how to stop, avoid or counteract a flying kick can be far more useful than knowing how to land one yourself.

The Run button is especially powerful. Backing off won't cut it against this move. Hold the Run button while pressing the **Directional button** toward your opponent to execute a run. But make sure you have a move ready when you meet face to face.

KLOSE QUARTERS

Move Player

(All Directions)

Down = Crouch

Up = Jump

Moves used during close in combat situations are the **Elbow**, the **Knee**, the **Bonebreaker** and the **Throw**. They are highly effective and do not require full limb extension, which is impossible in close quarters. Although these moves are potent, they can only be used when you are directly adjacent to an opponent. Give it a try. Press the Attack Buttons in a certain sequence for different types of "Kombos".

BASIC KOMBAT MOVES

All of the **Mortal Kombat 4** warriors possess expert fighting skills. What raises them above their peers are the special moves which they've created and perfected. In order to become a superior warrior, skilled enough to win the title of Grand Champion, you too must learn and perfect these moves. Whether you use special kicks or elemental bolts, **Mortal Kombat 4** warriors are the fiercest and most ferocious combatants in the Universe. Mastering their special moves could propel you to that level of greatness (see next page).

KROUCHING MOVES

Defensively, the crouching moves let you escape from close proximity, avoid punches, aerial weapons and throws. Offensively, the uppercut executed from the crouch, is one of the most powerful offensive weapons.

To do the crouching moves, hold the **Directional button Down (Crouch)** and simultaneously push **High Kick** or the **Low Kick** button for a crouching kick. Hold the **Directional button Down (Crouch)** and push the **High Punch** for uppercut. The **Block** can always be used to defend against your opponent's moves.

SPINNING MOVES

The spin is the key to exotic moves, such as the **Roundhouse Kick** and the **Foot Sweep**. The **Foot Sweep** hits your opponent's ankles and knocks him on his butt.

The **Roundhouse** is a spinning kick that nails your opponent in the face. To execute the spin moves, hold the **Directional button** away from your opponent while you press the **Kick buttons**.

All together, these fundamentals are the foundation for both a strong defense and a potent offense.

AERIAL MOVES

Move Up
or Toward
Opponent

Flying Kicks

Flying PUNCHES

The final moves one should learn are these Aerial moves: **Flying PUNCHES** and **Kicks**.

To execute these moves, either jump in place (**Directional button UP**) or towards (**Directional button UP+Fwd/Back**) your opponent. Press the game's various **Attack Buttons** while you're in the air. Unlike most attacks, aerial attacks must be timed properly to land blows.

SECRET KODES

At the bottom of the VS Battle Screen you will see a row of six boxes with different icons in them. Player 1 can change the symbols in the first three boxes by pressing the **Low Punch**, **Block** and **Low Kick** buttons. Player 2 can do the same with the other three symbols. The six symbols represent secret codes which can have subtle or dramatic effects on game play (see next page).

SECRET KODES

Some players find it easier to memorize the codes by referring to them in terms of the number of button presses it takes to get the proper symbols in place. In any case, you'll get the hang of it after a few tries. Remember you have to be fast and precise. No one said this was supposed to be easy.

Note: You can find secret codes in store bought Strategy Guides, game magazines, the Internet or with a little experimentation on your part. Have Fun.

Pressing any code action button 7 times will cause the order of the icons to start over again. In other words, pressing **X** button that corresponds to a box with a skull symbol 7 times will change back to the skull icon.

Each button causes the symbol in the corresponding box to change to the next icon in a predetermined order. If you hold up while pressing either **Low Punch**, **Block** or **Low Kick**, the order in which the icons are cycled will be reversed.

THE STORY

Thousands of years ago in a battle with the fallen Elder God known as Shinnok, I was responsible for the death of an entire civilization.

To rid all realms of Shinnok's menace I waged a war that plunged the Earth into centuries of darkness and banished Shinnok into a place called the Netherealm.

Now after Shao Kahn's defeat at the hands of Earth's warriors, Shinnok has managed to escape his confines in the Netherealm.

The war is now being fought once again. Only this time it can be won by mortals.

GORO

The half human, half dragon stood as Shang Tsung's protector in the first tournament. Goro took the Mortal Kombat title from the original Kung Lao, only to have it won from him nine generations later by Lao's ancestor, Liu Kang. Seeking revenge, the Shokan prince has returned from the Outworld to crush Liu Kang in Mortal Kombat.
